

Attention Utah Medicaid Pharmacy Providers

Addition of Vivitrol to Utah Medicaid pharmacy benefit

Effective January 1, 2018, long-acting injectable drugs for the treatment of opioid use disorders, such as Vivitrol will be covered under the Utah Medicaid pharmacy benefit.

In accordance with R414-60-12, when dispensing provider-administered drugs for the treatment of opioid use disorders, the pharmacy may only release the drug to the administering provider or the provider's staff. These drugs may not be dispensed directly to the patient or patient's representative.
